This paper presents instructions for formatting abstracts to be submitted to the 15th Asian forum on Graphic Science 2025 (AFGS 2025 Chiang Mai, Thailand). These instructions are to be strictly followed so that all papers in the proceedings have a consistent appearance. This paper itself is formatted according to the formatting rules. Use it as a model and edition template. This document is supplied as a Microsoft Word file containing preformatted styles. We strongly suggest authors to replace the text of this file with their own, preserving the formatting. All papers must be prepared in Microsoft Word or other file-compatible software using the font Times New Roman and convert it in **pdf-format** as a result. This document must contain only the abstract title, authors and their affiliations, abstract and keywords. You should prepare an abstract which correctly reflects your lecture (300 to 500 word long, maximum 2 pages including figures, English language only).

Please submit your abstract of a pdf file via EasyChair Conference System. You may include figures and tables in the abstract.

Abstracts are to be submitted online via https://easychair.org/conferences/?conf=afgs2025

Upload the abstract files in the section titled "Upload Paper".
